# WE ARE HIRING

Maybe, You're The One We're Looking For

## Software Engineer- Java

If getting into a product-based company is your dream then choose your career as a Software Engineer at Zycus. Work on cutting edge technologies with one of the finest SAAS software product organization from India that endeavors to leave its mark in the global technology space.

### Join the Powerhouse of Innovation

Zycus is looking for the sharpest minds in the country to help build its world class AI driven software product at its R&D center at Mumbai, Bangalore and Pune.

We are recognized as world leaders in AI driven Procurement solutions and lead at front with innovation and agility. Zycus gives you the environment to create an impact on the product and transform your ideas into reality. Our R&D team uses some of the latest tech stack which includes technologies like Artificial Intelligence, Machine Learning, Java, J2EE, HTML5, CSS, CSS3, Node.JS, NoSQL, MongoDB, React.JS, DevOps, BigData, Hadoop, Microservices

### Wondering what you will be doing?

As a Software Engineer at Zycus you will be part of an agile team and will be involved in developing innovative products.

- Use cutting edge technologies to Design, Develop, review (code/design) and unit test.
- Support cross functional departments in different projects/modules to deliver quality software on time.
- Create competitive edge in Zycus's solution by innovating and solving technical challenges.
- Follow Zycus's Product Development process and participate in improving the process.
- Ensure your work meets or exceeds defined quality standards through exhaustive testing, peer reviews and SQA process.

## What are we looking for?

- General programming skills. Knowledge of Java, spring framework would be an added advantage.
- Strong software development fundamentals and knowledge of Object-Oriented Programming and design will be required
- Knowledge of Software design & debugging
- Knowledge of relational databases such as MySQL, PostgreSQL and non-relational databases NoSQL, MongoDB. Strong knowledge of SQL queries will come in handy as well.
- Knowledge of web frontend technologies like HTML, CSS, Javascript, and JQuery
- Fluent communication skills
- Strong Logical, analytical and problem-solving skills and
- Excellent Academic background and achievements

**Education Background:** BE in CS/IT

**Job Location:** Mumbai / Bangalore / Pune

## Five Reasons Why You Should Join Zycus

1. **Cloud Product Company:** We are a cloud SaaS company and our products are created by using the latest technologies like ML and AI. Our UI is in Angular JS and we are developing our mobile apps using React.
2. **A Market Leader:** Zycus is recognized by Gartner (world's leading market research analyst) as a Leader in Procurement Software Suites.
3. **Move between Roles:** We believe that change leads to growth and therefore we allow our employees to shift careers and move to different roles and functions within the organization
4. **Get a Global Exposure:** You get to work and deal with our global customers.
5. **Create an Impact:** Zycus gives you the environment to create an impact on the product and transform your ideas into reality. Even our junior engineers get the opportunity to work on different product features.

## About Us:

Zycus is a pioneer in Cognitive Procurement software and has been a trusted partner of choice for large global enterprises for two decades.
